

ViPRO

Body Worn Video **Power to Identify**

Why ViPRO?

Customer oriented

We listen to your needs. At ViPRO, we take each individual customer's needs seriously with solution-oriented approach. We strive to deliver 100% customer satisfaction with accountability, speedy service and quality support.

Vision in Mobility

ViPRO is strong at "Vision and Visualization" of mobility-based video surveillance and connectivity. We are specialized in both software development and hardware electronics security.

Innovation

ViPRO solution is industry field-proof with technological competence. We keep on investing on product research and development and accommodating solution catering to diversified business applications.

Professional

We excel at what we do. ViPRO experts comprise over 15 years of industry experiences in integrated video security solution. We provide what suits the best to our customers and ensure long-term profitability with right market focus and approach.

Corporate Citizenship

ViPRO acts as a global citizen to provide high-quality video surveillance solution for mobile application and on-board security. It is our responsibility to offer durable and affordable security solution to protect the safety of end customers and assets in our specialized areas.

Vertical Market

ViPRO Body Worn Video series provide the most flexible and high-quality Body Worn Camera specially designed for Police and Law Enforcement application. The law enforcement recorders can be extended with 3G, WIFI, intercom devices which deliver diversified application for law enforcement professionals.

Who needs Body Worn Camera?

Body worn camera (BWC), refers to video camera equipment which is typically utilized by law enforcement to record their interactions with the public, gather video evidence at crime scenes, and has been known to increase both officer and citizen accountability. BWCs are notable because their placement, often on the front of a shirt, provides for first person perspective and ultimately a more complete chain of evidence.

What benefits does Body Worn Camera bring?

- Increase work efficiency and reduce crime for law enforcement for first hand evidence collection
- Minimize complaints or lawsuits from on-site incidents and accidents
